Letter of Recommendation

To Whom it May Concern:

I am pleased to provide a reference for Ms. Martina Koronci Babinská. I have known her for 10 years from 2005, when at the very beginning of her university study I was her teacher in the single variable calculus course. Later, from 2011 to 2015 I was the supervisor of her PhD thesis. This allowed me to see the great progress he made during the first 5 years of her university study. He is a self-motivated individual willing to go beyond what is required.

While working on her PhD thesis Martina Koronci Babinská demonstrated a broad range of skills, extraordinary sense of purpose, great scientific integrity, initiative, responsible approach, readiness to search for new knowledge.

I am confident that Ms. Martina Koronci Babinská will continue to be very productive. She has my highest recommendation.

If you have any further questions, please do not hesitate to contact me.

Bratislava, November 8, 2015.

Yours sincerely,

Zbyněk Kubáček
